# Report of the management: the crypto market

## Assessment crypto market

2017 was inconsistent. It was characterized by the increase in Coin ICOs and the growing importance of emerging economies such as China and their behavior towards cryptocurrencies. After a positive start of the year, a first massive correction took place in June.

Investor's mood and the coin markets subsequently recovered, also due to lasting interests in Europe and Asia. In addition, the leading Bitcoin reached one high after the other. As beautiful as this supposedly sounds, more and more hurdles build up in the background, which also do not allow the Bitcoin to expand.

## Expectations for 2018

We expect Bitcoin, the dominant cryptocurrency, to continue on its course in 2018. However, we expect that its dominance in the overall market will continue to decline.

We see the price development as given, since more speculators will bring in and most likely further stock exchanges, such as the NY stock exchange will start the futures trading of Bitcoin.

On the other hand, the technological hurdles of the first cryptocurrency are becoming increasingly apparent, paving the way for more technologically advanced cryptocurrencies, such as the UNISON COIN. Due to the increasing interest, the transaction times continue to lengthen and the transaction costs are also increasing.

Furthermore, we expect an increasing interference of governments that want to take advantage of the unregulated situation in their favor, e.g. North Korea and Russia. On the other hand, western states and also the US will be increasingly interested in regulating.

# Report of the management: review and outlook

## Quarterly report – October to December 2017

After 2 years of intensive study and analysis of the markets and crypto currencies, we decided in 2016 to create our own coin, which in every aspect meets the needs and desires of the market.

- In September 2017, the programs and the team were ready for the pre-launch
- Official soft launch: Oct. 22, 2017
- Despite restrained information policy, we were able to win the confidence of 250 interested parties by the end of the year.

The review of the events and developments on the crypto market in 2017, as well as the outlook for the upcoming developments in 2018, show that we are on track with our project. The strategic planning of the project, as well as the technological differentiation are relevant to the market and come at just the right time.

## Growth Planning for 2018

2018 is divided into 3 strategic phases, which will provide growth until the official launch of the coin on 1 January 2019:

- *Phase 1: Internationalization through multilingualism*  
Gradually, new languages are added, allowing access to more people in their mother tongue
- *Phase 2: Exchanger & acquiring acceptance points*  
With the launch of our innovative exchanger, we not only set new standards & opportunities for crypto currencies, but also start the acquisition phase for acceptance points
- *Phase 3: Full Transparency & Big Investors*  
Shortly before the launch of the coin, we will disclose all information with the last update of our whitepaper, giving 100% insight. This is when we pull out all triggers to attract big investors up to institutional investors for the last pre-launch phase

# Control and decision-making bodies

## Managing director

Update: 01.01.2018

Nino M. Fiammingo

Managing director

Paraguay

## Supervisory board

Ralf Passing

Board member

Director Deutschlandteam Inc. - Panama

Willy Jaheruddin

Board member

Roermond

## Control authority

The company is subject to the State Control Office SET for tax payments in Villarrica / PY and the voluntary submission of control by the supervisory board

# Our vision

The solution for bottleneck-free transactions of digital currencies

**bottleneck**

**Go-ahead for all directions**

The UNISON COIN is an evolution in the field of digital currencies. The management has decided to release the information on technology only gradually to protect from copying at this early stage.

We are developing a multi-layered messaging structure to make payments in real time. A pure blockchain is uninteresting because it focuses all traffic on this channel, which leads with larger transaction amounts to a bottleneck.

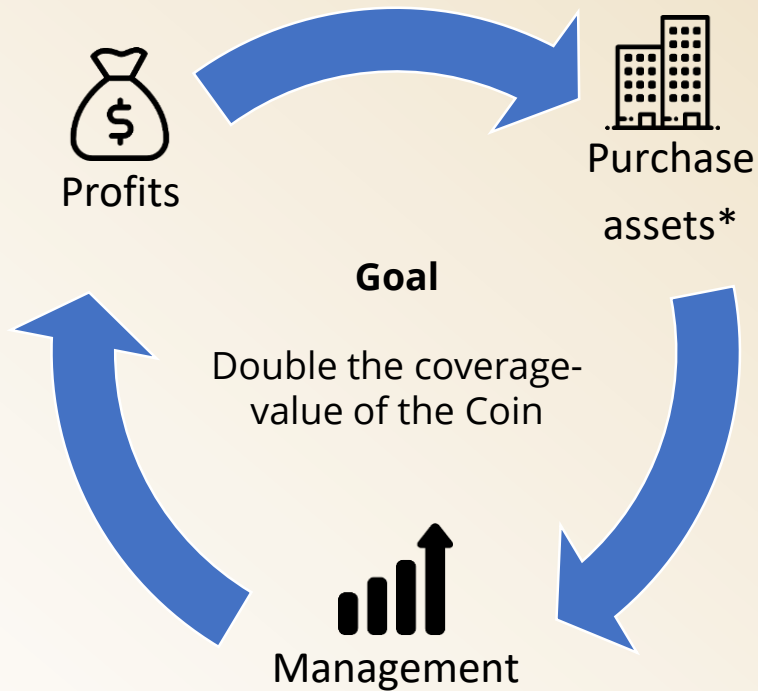

At the same time, a sophisticated, lean and decentralized system will process all transactions. Resources for mining are not necessary.

# Portrait UNISON COIN: investments

As exchange value for the sale of the token we receive FIAT and cryptocurrencies. The budgeted money for the coverage of the coin should double yearly

## Intended areas of investments

- ✓ Precious metals
- ✓ Resorts
- ✓ Real estate
- ✓ Start-Ups
- ✓ Cryptocurrencies

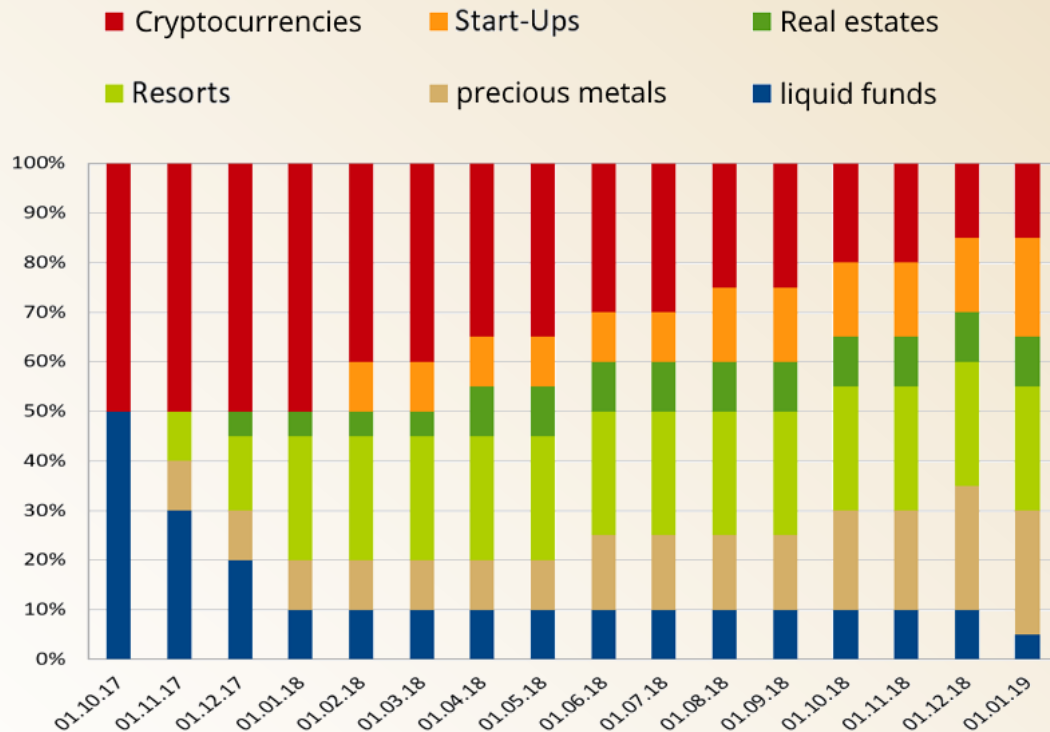

# Portrait UNISON COIN: investments

While we are continually converting liquid funds into assets we are delaying this for the cryptocurrencies to realize increases of the exchange rate.

## First gross planning of the investment diversification

### Plan up to the end of 2018

- ✓ Immediate transfer of liquid funds into real assets
- ✓ Holding of cryptocurrencies and transformation of exchange increases into real assets
- ✓ 25 % High-risk investments
- ✓ 45 % Middle-term investments
- ✓ 30 % Fast realisable investments

# Portrait UNISON COIN: organisation und key figures

The comparatively small team successfully implemented the concept. In a few months already considerable achievements could be achieved with a low cost structure
